

BIO-PLASTIC EUROPE Stakeholder Virtual Meeting:

Current Realities of Biodegradable and Biobased Plastics
in Circular Economy

26th November 2020

The project BIO-PLASTIC EUROPE has been launched in October 2019, and its duration until September 2023. This project addresses the topic “Sustainable solutions for bio-based plastics on land and sea”, within the Horizon 2020 Programme, of the European Union. Out of twenty-two, Heng Hiap Industries is the only one Asian partner of this project. Currently, the plastic industry faces the challenge that the attitude towards plastic is increasingly negative. In this virtual meeting, we would like to offer our stakeholder to open discuss the circular economy in plastic management.
